

Tired of finding Internet in hotel when you are traveling? Top Global's 3G Travel Router introduces a new Internet access solution for business travel group. This solution enables all members of business travel group share one cellular account to access Internet.

Using Top Global's 3G Travel Router is an experience of "Plug and Play", and none specified network setup is required. After plugged to power supply, it will connect the Internet automatically and no wired backhaul is necessary. After that, all users can access Internet by Wi-Fi compliant clients (e.g. laptop, PDA etc.).

Up to 4 LAN ports in 3G Travel Router make it possible for Wi-Fi incompatible devices to connect to 3G Travel Router.

Benefits:

- Enhance Mobile Workforce Efficiency
- Cost effective solution compare to expensive Internet access cost in hotels
- One cellular network account for all members
- Easy to use, "Plug and Play"
