

This solution is for small office and home office (SOHO) application based on 3G Phoebus from Top Global. 3G Phoebus eliminates the need for cables, extra switches, routers, and also eliminates T1, DSL and other backhaul costs. So it is a very economical solution for small enterprises.

All office devices (e.g. Laptops, network printers, PCs, PDAs, and VoIP phone etc.) can share one 3G Phoebus for Internet access. This solution is a totally wireless solution and offers network flexibility for users, and makes construction work easy and fast.

**Comparison with wire line:**

	Wire lines	MobileBridge™
Cost for Network Construction	High	None
Time for Construction	Long	Instantaneous
Construction Work	Difficult	Easy
Network Maintenance	Hard	Simple
